

MAXXAIR[®]

VENTILATION SOLUTIONS

YOUR #1 CHOICE FOR RV VENTILATION

THE ONLY VENT COVER TUFF ENOUGH
6-YEAR Limited WARRANTY*

*see website for warranty details

THE MAXXAIR ORIGINAL VENT COVER

- ▶ Let's in **FRESH AIR ANYTIME. . . Rain or Shine!**
- ▶ Prevents Heat Buildup in your RV
- ▶ Proven **SUPER-TOUGH** one piece design
- ▶ Mounts to all existing 14" x 14" roof vents
- ▶ **Not recommended for High-Powered Fans like MAXXAIR Standard Fan, ShurFlo Fan or Fantastic Fan**
- ▶ Use instead our FAN/MATE cover shown on the back of this sheet

INSTALLATION INSTRUCTIONS

1. Place the MaxxAir over the roof vent with the louver area facing the rear of the vehicle. After verifying that the MaxxAir is centered over the roof vent, use a pencil to trace the location of the slots in the MaxxAir mounting flange.
2. Position a mounting bracket on your roof so that the slot in the bracket intersects one of the locations traced on the roof. For maximum strength, place the mounting brackets as close as possible to the outside corner of your existing roof vent frame.
3. Mark the location of the screw hole in the bracket onto your roof vertical vent frame wall. Drill through the roof vent frame using a 3/16" dia. drill bit. Place one of the carriage bolts upward through the slot in the bracket and fasten the bracket to the roof vent wall using the small screw provided. The small washer, lock washer and hex nut should be placed on the inside of the roof vent frame wall. Install two brackets on each side of your roof vent as shown in the drawing.
4. Place the MaxxAir on the four upward pointing carriage bolts and fasten using the star washers and hex nuts provided. You may have to push the head of the carriage bolt up into the bracket slot to prevent the carriage bolt from turning during tightening of the nuts.
5. A slight air gap between the MaxxAir base and the roof after installation is normal and permits condensation to escape. Do not apply caulking to this area.

**THIS CONCLUDES THE INSTALLATION.
ENJOY YOUR NEW MAXXAIR ORIGINAL VENT COVER**

TOOLS REQUIRED

POWER DRILL WITH 3/16" DRILL BIT, PHILLIPS HEAD
