Go Power! Solar Flex™ kits use flexible, high-efficiency back-contact solar modules that conform to almost any surface. These kits use high-efficiency, marine-grade solar modules - a versatile battery charging solution that:

- avoids custom mounts (100 and 50 watt modules curve up to 30 degrees)
- can be affixed with adhesive or screws
- provides a durable surface (modules are less than 1/8" / 3mm thick)
- is ideal for lightweight RVs (modules are 82% lighter)

GP-FLEX-200 / 100 kits include high-efficiency monocrystalline solar panel(s) (200/100 watts), GP-PWM-30 solar controller, MC4 connectors and mounting hardware.

GP-FLEX-30 kit includes 1x high-efficiency monocrystalline solar panel (30 watts), new GP-PWM-10 (10 amp) solar controller, MC4 connectors and mounting hardware.

GP-FLEX-50 kit includes 1x high-efficiency monocrystalline solar panel (50 watts), new GP-PWM-10 (10 amp) solar controller, MC4 connectors and mounting hardware.

GP-FLEX-100E expansion kit includes 1x high-efficiency monocrystalline solar panel (100 watts), MC4 branch connectors and cable.
