Jamo A 804

Specifically designed for wall-mounting alongside today's flat screen TVs, the Jamo A 804 is a tall, three-way speaker intended for use as a main front, L/R channel and/or centre channel speaker.

The midrange/tweeter unit is an entirely new Jamo developed co-axial unit featuring WaveGuide technology. The clever 3-way construction of the Jamo A 804 produces a perfect sound dispersion pattern, giving you maximum freedom when positioning your flat screen, surround system and sofa. Delivering good, clean bass response from wall-mounted speakers is a challenge, but Jamo's flow-optimized port makes it possible for the A 804 to be a master in its class.

The bulk of the Jamo A 804's cabinet is formed from steel wrapped in a high density polymer, while the ends are formed of high-gloss lacquered aluminum. Leatherette hugs the sides of the speaker giving it a luxurious presence.

The Jamo A 804 delivers a surprisingly effective bass in its own right, but adding a subwoofer really beefs things up. Consider adding Jamo SUB 800 and you will feel the earth shake.

If you want a discrete surround solution, you may consider using one of our unique in-ceiling surround speakers for the rear channel or alternatively Jamo A 500 or Jamo Graphic.

Specifications	A 804
System	3-way Bass Reflex
Woofer [mm / in]	2 x 114 / 4½
Midrange [mm / in]	114 / 4½
Tweeter [mm / in]	19 / ¾
Power long / short term [W]	80 / 120
Sensitivity [dB/2,8V/1m]	87
Frequency Range [Hz]	70 - 20,000
Impedance [Ohm]	6
Weight [kg / lb]	5.9 / 13.0
Dimensions HxWxD [mm / inch]	700 x 160 x 100 / 27.6 x 6.3 x 3.9
Finishes	High Gloss Black or High Gloss White
