

LCI 5" OneControl™ Touch Panel

Description

The OneControl™ Touch Panel is a capacitive touch screen user interface compatible with CAN networked systems. The unit is wall mountable and presents a 5 inch touch screen to the end user.

Product is compatible with the Controller Area Network (CAN) bus. Product supports both CAN 2.0A and CAN 2.0B buses. Applications may access the CAN bus via the SocketCAN kernel driver for Linux.

Running the Android™ 4.4 KitKat operating system, the OneControl™ Touch Panel is compatible with a wide variety of Android applications found in app stores and on the internet. Custom android applications may be created to take advantage of the native CAN bus support.

Plug-and-play compatibility with LCI myRV® CAN systems means that you can remotely control the system from a wide variety of LCI products.
