

6.2. Schematic Diagrams  
 6.2.1. Tuner and Power Supply Section  
 (1) For SR-2 (Canada) & SR-2A

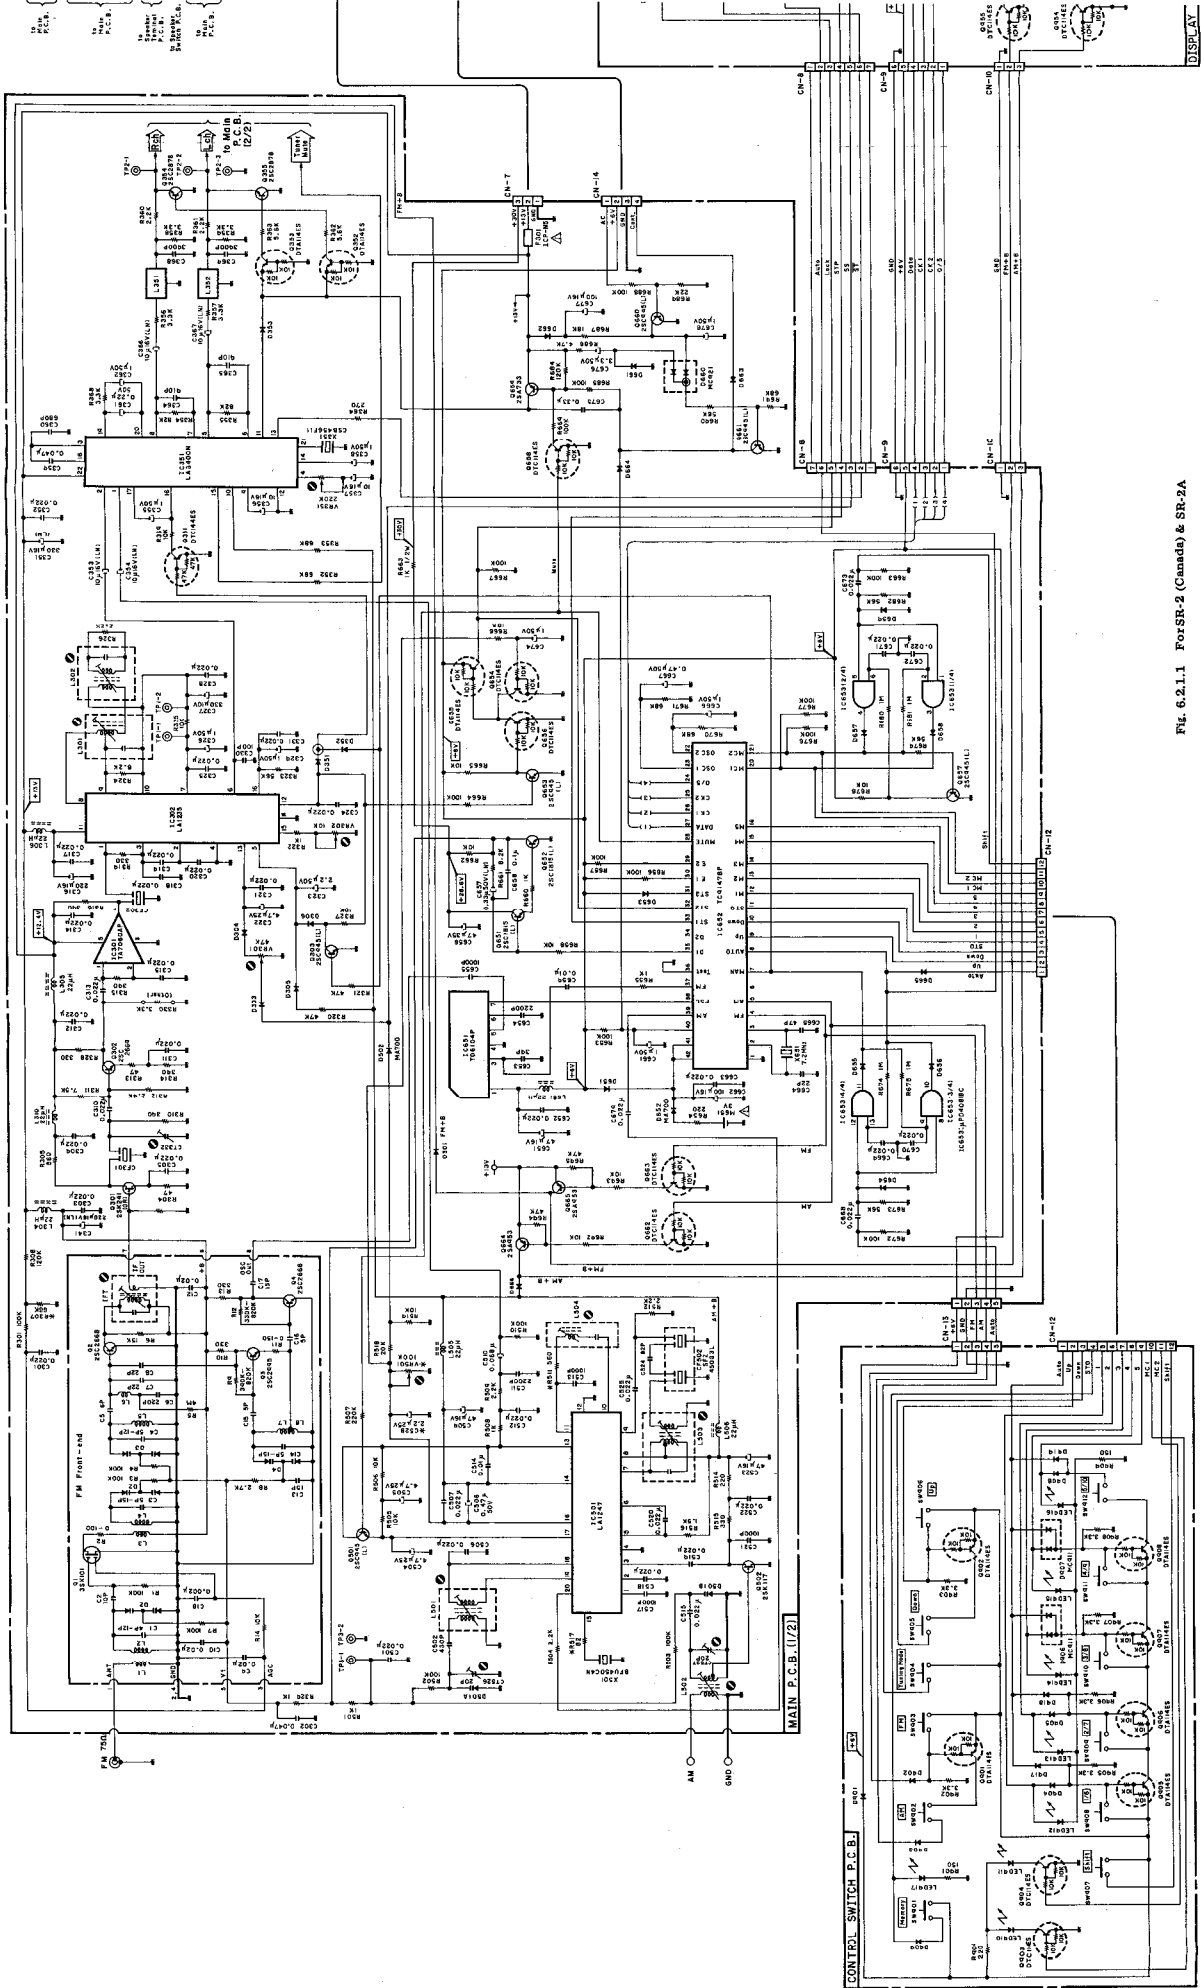

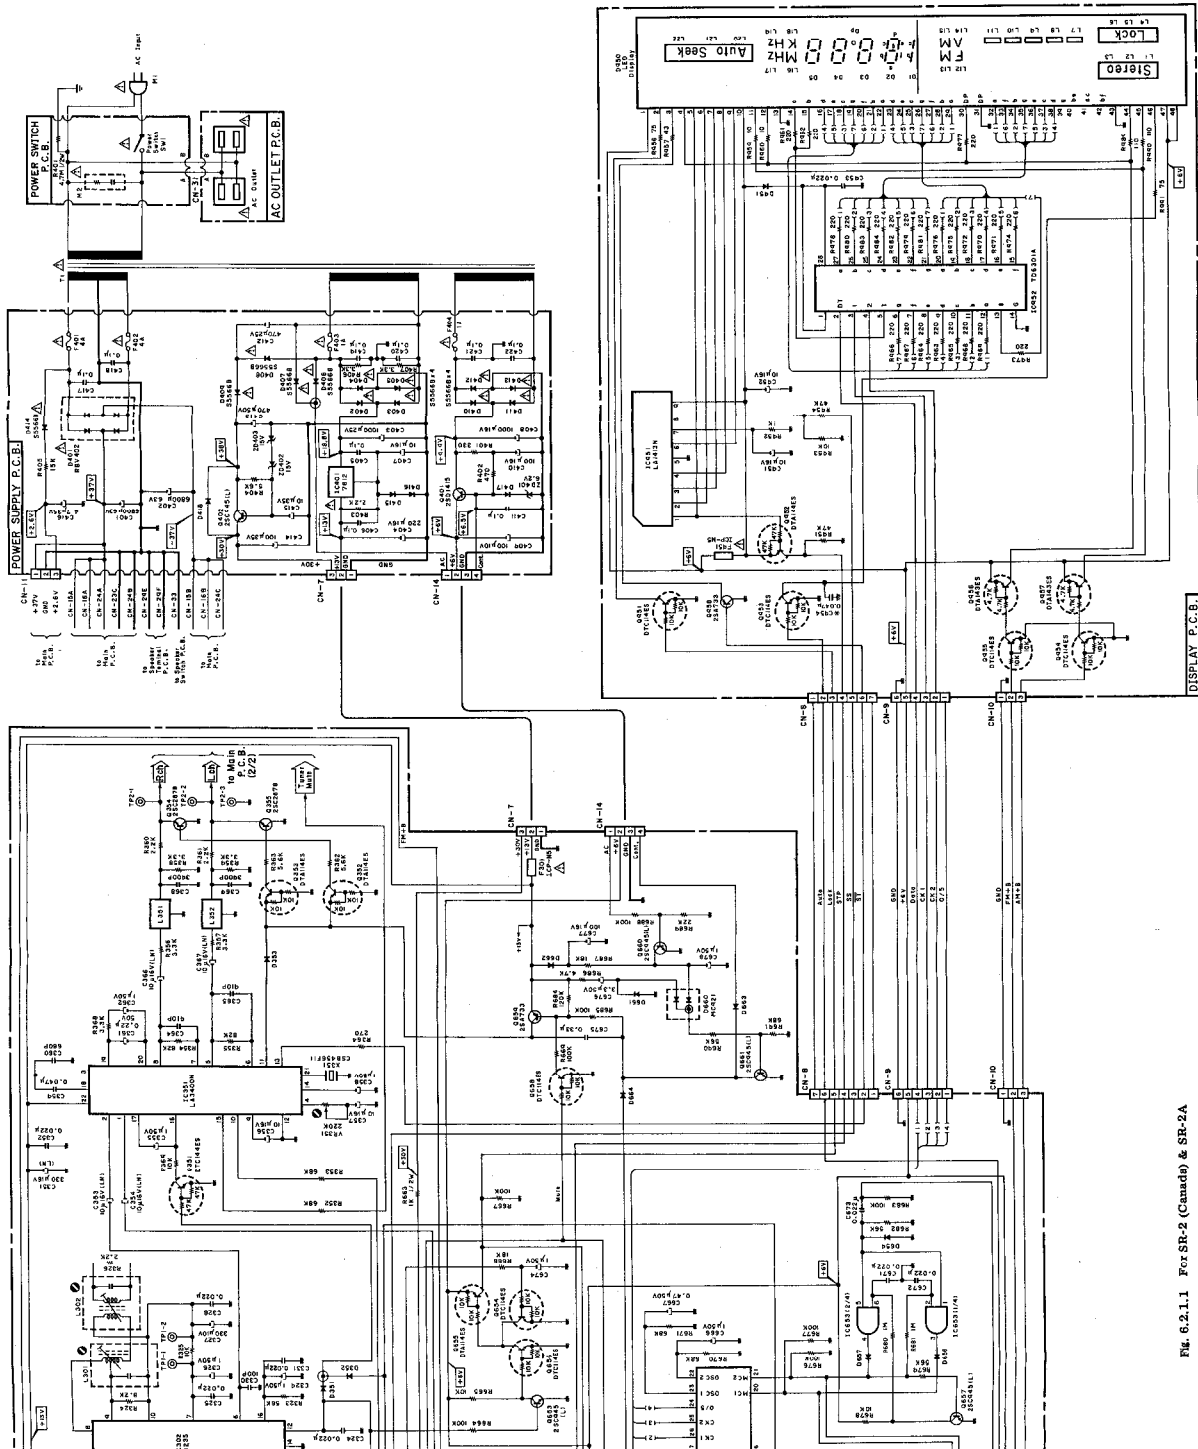

FIG. 6.2.1.1 For SR-2 (Canada) & SR-2A

**WARNING:**  
Parts marked with the symbol  $\triangle$  have critical characteristics.  
Use **ONLY** replacement parts recommended by the manufacturer.  
It is recommended that the unit be operated from a suitable DC supply or batteries during initial check-out procedures.

**CAUTION:**  
Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamperes, or if the resistance from chassis to either side of the power cord is less than 240 k ohms, the unit is defective.  
**WARNING — DO NOT** return the unit to the customer until the problem is located and corrected.

**For Lithium Battery:**  
Use **ONLY** replacement parts recommended by the manufacturer.  
Replacement must be done only by qualified service personnel because of risk for explosion.

- Notes:
1. Diode is 1S853, 1S1555, or 1S8176 unless otherwise specified.
  2. Resistor and capacitor marked with \* show typical values.
  3. 2SA189, 2SA608SP, 2SA1048 and 2SA1175 are interchangeable with each other.
  4. 2SC945, 2SC365P, 2SC2458 and 2SC2785 are interchangeable with each other.

**WARNING:** Parts marked with the symbol  $\triangle$  have critical characteristics.

Use **ONLY** replacement parts recommended by the manufacturer. It is recommended that the unit be operated from a suitable DC supply or batteries during initial check-out procedures.

**CAUTION:** Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamperes, or if the resistance from chassis to either side of the power cord is less than 240 k ohms, the unit is defective.

**WARNING — DO NOT** return the unit to the customer until the problem is located and corrected.

**For Lithium Battery:**  
Use **ONLY** replacement parts recommended by the manufacturer. Replacement must be done only by qualified service personnel because of risk for explosion.

- Notes:
1. Diode is 1SS53, 1S1555, or 1SS176 unless otherwise specified.
  2. Resistor and capacitor marked with \* show typical value.
  3. 2SA733, 2SA6088P, 2SA1048 and 2SA1175 are interchangeable with each other.
  4. 2SC945, 2SC5363P, 2SC2458 and 2SC2875 are interchangeable with each other.

(3) For SR-2E (Europe & Germany)

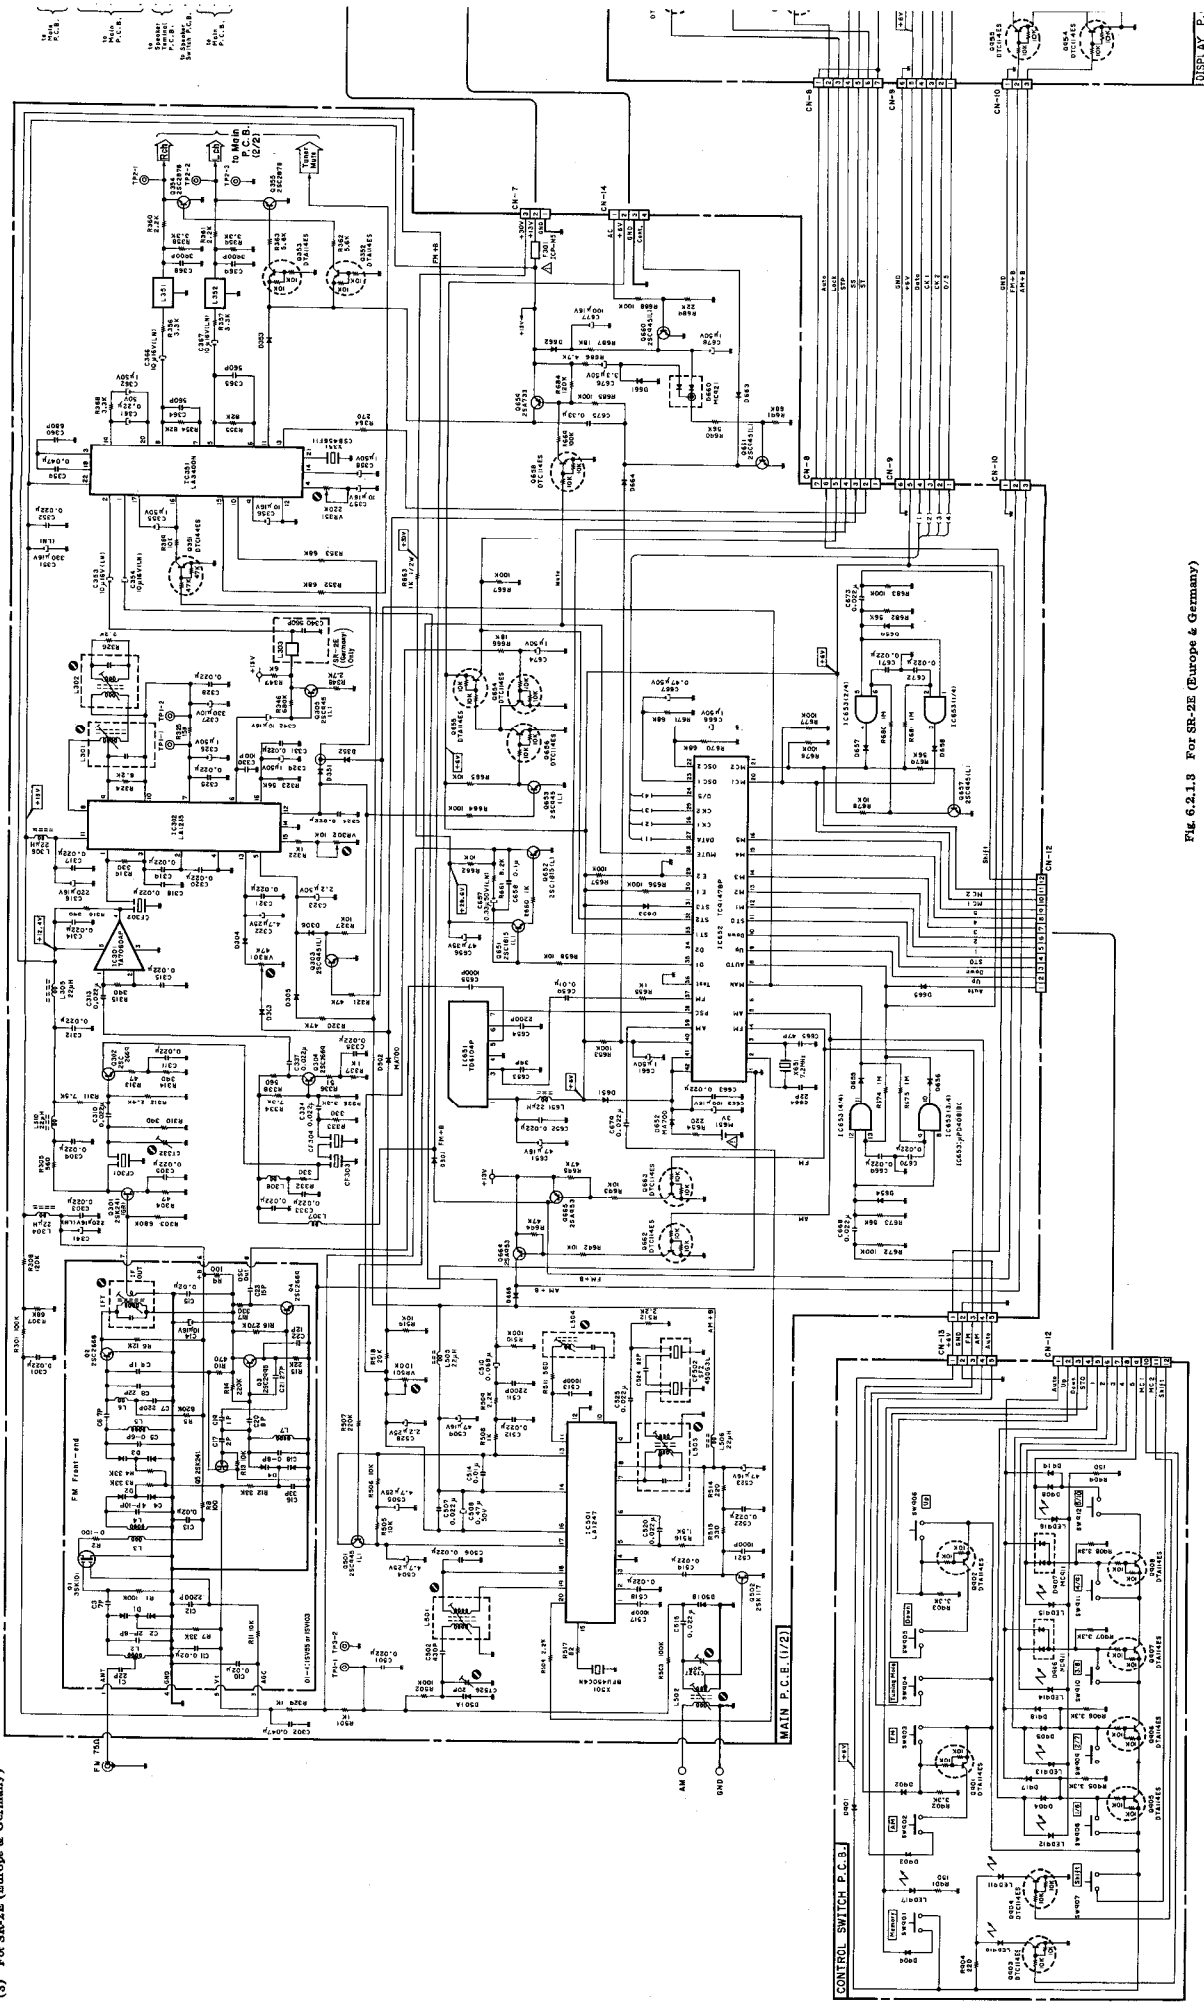

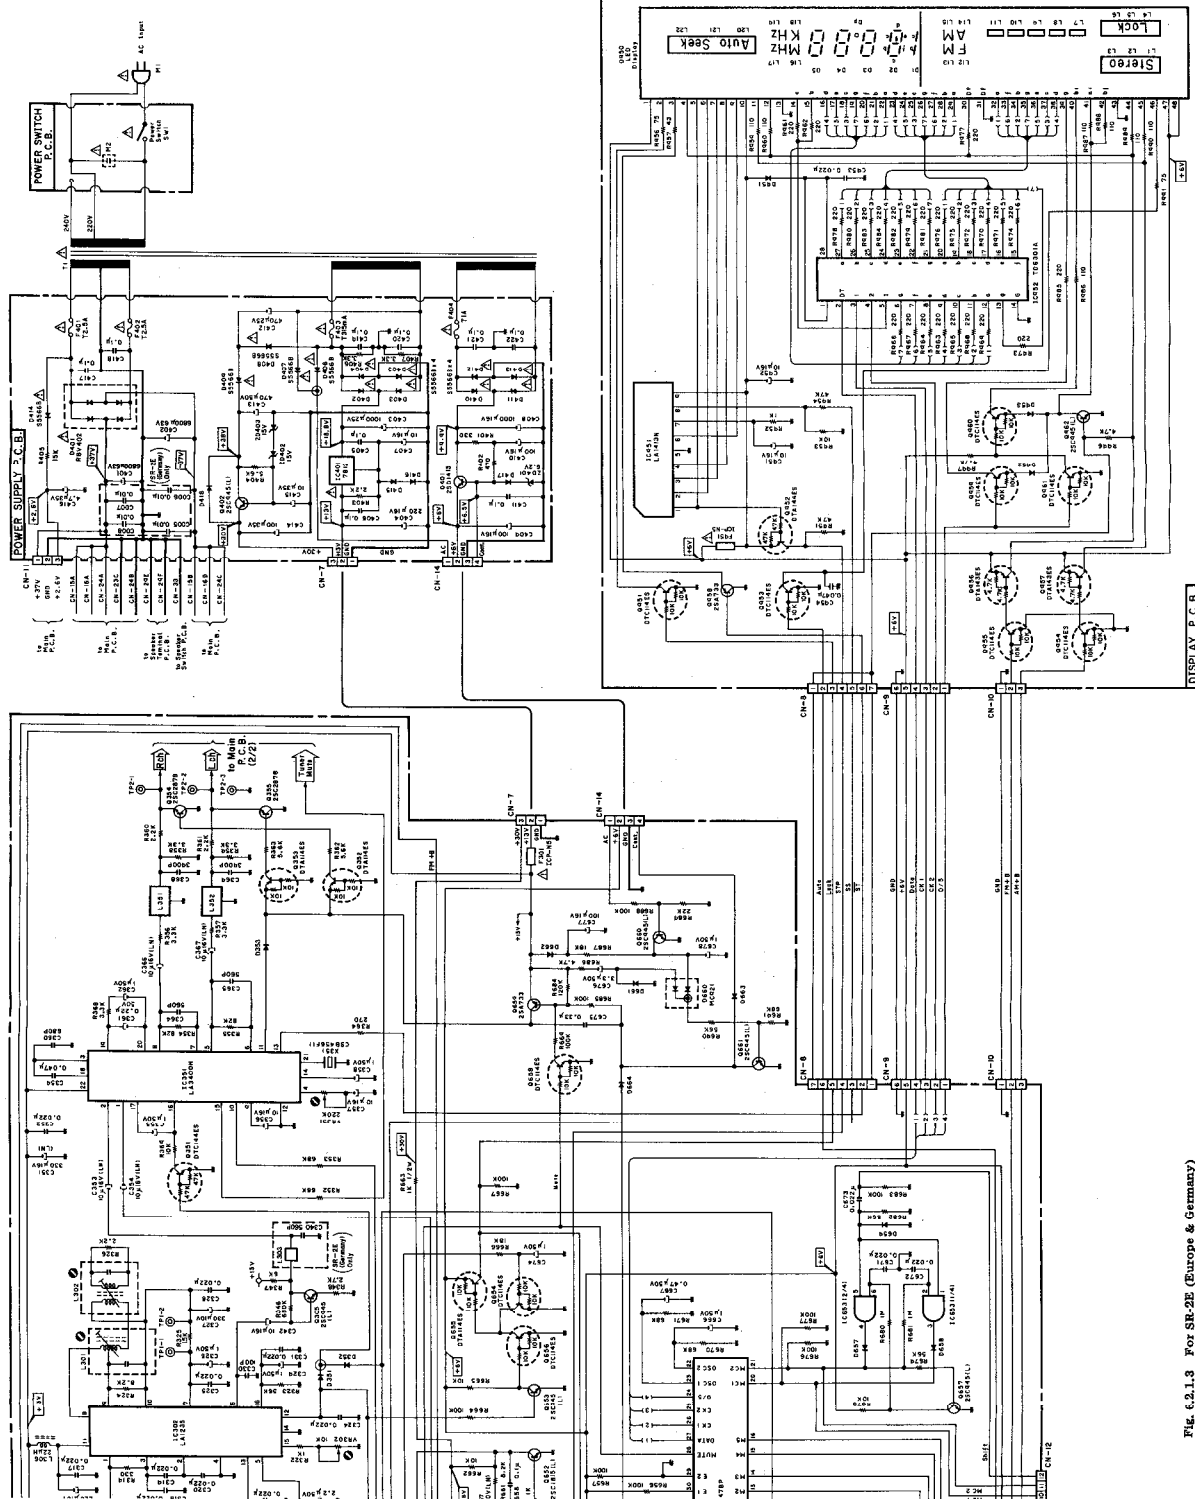

Fig. 6.2.1.3 For SR-2E (Europe & Germany)

**WARNING:** Parts marked with the symbol  have critical characteristics. Use **ONLY** replacement parts recommended by the manufacturer. It is recommended that the unit be operated from a suitable DC supply or batteries during initial checkout procedures.

**CAUTION:** Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check if the leakage current exceeds 0.5 milliamper, or if the resistance from chassis to either side of the power cord is less than 240 k ohms, the unit is defective. **WARNING — DO NOT** return the unit to the customer until the problem is located and corrected.

**For Lithium Battery:**  
Use **ONLY** replacement parts recommended by the manufacturer.  
Replacement must be done only by qualified service personnel because of risk for explosion.
