input (T1, T2 or T1-T2), display hold and low battery. All DMM connections plug into the front of the unit. Thermocouples, earphones and the ac adaptor plug into the rear panel of the unit, which also contains a three-position volume selector switch.

On top of the HHM2 meter is an on/off switch along with six pushbuttons to select from among a variety of unique additional functions. These include a "TEMP" function, which selects thermocouple input T1, T2 or the differential. The "Ω ZERO" function compensates for the resistance of the test leads when taking resistance measurements. "DISPLAY

HOLD/SPEAK" selects continuous or on-demand speech or freezes the display. The "SPEECH" button turns the speech function on and off. "°F/°C" switches the temperature units. "AC/DC" similarly switches between ac and dc measurements.

Included with each HHM2 is a set of test leads for measuring voltage, current and resistance. The red lead handle includes a convenient pushbutton to easily operate the speech function while holding the leads. An optional pistol grip type K thermocouple handle is also available with a similar pushbutton to activate the voice function remotely for temperature measurements.
