SAFETY INFORMATION

A

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

■ Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

1. SERVICE PRECAUTIONS

1.1 NOTES ON SOLDERING

- For environmental protection, lead-free solder is used on the printed circuit boards mounted in this unit. Be sure to use lead-free solder and a soldering iron that can meet specifications for use with lead-free solders for repairs accompanied by reworking of soldering. Do NOT use a soldering iron whose tip temperature cannot be controlled.

1.2 NOTES ON SERVICING

For final-check playback after repair, a commercially available record is required.
The details, see "3.2 JIGS LIST".

---	--

■ Turntable part

Drive method	Servo type direct drive
Motor	3-phase brushless DC motor
Braking system	Electronic brake
Rotation speed	33 1/3 rpm, 45 rpm, 78 rpm
B Rotation speed adjustment range	±8 %
Wow and flutter	0.15 % or less WRMS
S/N ratio.....	50 dB or higher
Turntable	Aluminum die-casting Diameter: 332 mm
Starting torque	1.6 kg·cm or more
Start time	1 second or less (at 33 1/3 rpm)

■ Tone arm part

Arm type	Universal type S-shape tone arm, gimbal-supported type bearing structure, static balance type
Effective length	230.5 mm
Overhang.....	16 mm
Tracking error	Within 3°
C Arm height adjustment range	6 mm
Stylus pressure variable range	0 g to 4.0 g (1 scale 0.1 g)
Proper cartridge weight	9.5 g or less (single cartridge)
Cartridge type	VM

■ Output voltage

PHONO	2.5 mV/1 kHz
LINE.....	150 mV/1 kHz

3. BASIC ITEMS FOR SERVICE

3.1 CHECK POINTS AFTER SERVICING

Items to be checked after servicing

To keep the product quality after servicing, confirm recommended check points shown below.

No.	Procedures	Check points
1	Confirm whether the customer complain has been solved.	The customer complain must not be reappeared. Audio and operations must be normal.
2	Check whether the unit can be turned ON or OFF.	The indicators on the unit must light when the unit is turned ON.
3	Check playback operations.	The turntable must turn or stop properly when the START/STOP button is pressed. The tone arm must move properly when the lifter lever is moved up or down.
4	Check the pitch adjustment.	Check whether the pitch can be adjusted, using the TEMPO slider.
5	Check the LINE OUT/PHONO OUT signals.	Play a record back and check that the audio output from the LINE OUT/PHONO OUT terminals is normal. (For checking, use a powered speaker, pre-main amplifier or a DJ mixer.)
6	Check the appearance of the product.	No scratches or dirt on its appearance after receiving it for service.

See the table below for the items to be checked regarding audio.

Item to be checked regarding audio	
Distortion	Volume too high
Noise	Volume fluctuating
Volume too low	Sound interrupted

3.2 JIGS LIST

Jigs List

Jig Name	Part No.	Purpose of use / Remarks
LP record or EP record	(Marketed product)	For checking playback operations and the audio output.
Spacer	Dust cover (GGP1257)	Registered the Dust cover (705-PLX500-1650) as a jig for services. You have to procure four pieces of cushion to be placed at the four corners of the dust cover where the turntable is to contact on your own, in order to prevent the top panel of this unit from being damaged.
	or Four cylindrical wood offcuts, etc., of 40 mm dia. x 80 mm in length or longer	To be placed at the four corners of the unit when diagnoses are to be performed with the unit upside down
USB cable	GGP1193	For checking the audio output.

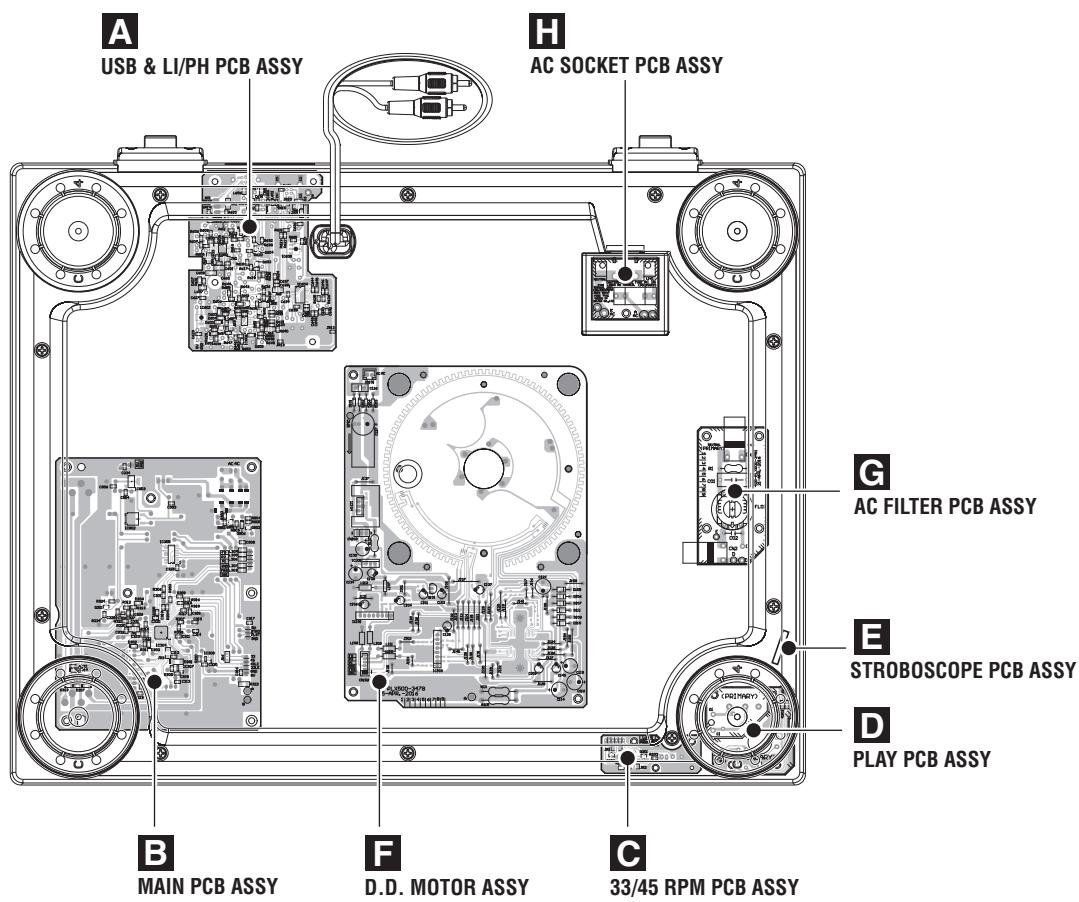

Lubricants and Glues List

Name	Part No.	Remarks
Adhesive	GYL1007	Refer to "7. DISASSEMBLY".
Grease	GYA1004	Refer to "9.2 EXTERIOR SECTION".

5.2 AUDIO OUTPUT CHECK USING rekordbox

A Confirm that the sound of the analog record played back by this unit is output properly from the USB terminal to the computer in this item.

[Installation of rekordbox]

A brief explanation of how to install rekordbox on a PC is given below. For details, refer to the operating instructions of the software.

B Install the driver software that enables audio output from the computer beforehand.

The operating environment of the PC required for installation of rekordbox is shown below.

Minimum operating environment

Supported operating systems	CPU and required memory	Others
Mac OS X: 10.11/10.10/10.9 (latest update)	Intel® processor Core™ i3/i5/i7, Intel® processor Core™ 2 Duo 4 GB or more of RAM	USB port A USB 2.0 port is required to connect the computer with this unit.
Windows: 32-bit version or 64-bit version of Windows 10/Windows 8.1/Windows 7 (latest service pack)	Intel® processor Core™ i3/i5/i7, Intel® processor Core™ 2 Duo 4 GB or more of RAM	Display resolution Resolution of 1280 x 768 or greater Internet connection An Internet connection is required for registering the rekordbox user account and downloading the software.

- For information on the latest system requirements, compatibility, and supported operating systems of rekordbox, see [System Requirements] on the rekordbox.com site below.
<http://rekordbox.com/>
- Operating System support assumes you are using the latest point release for that version.

For the latest version of the rekordbox software, access rekordbox.com and download the software from there.

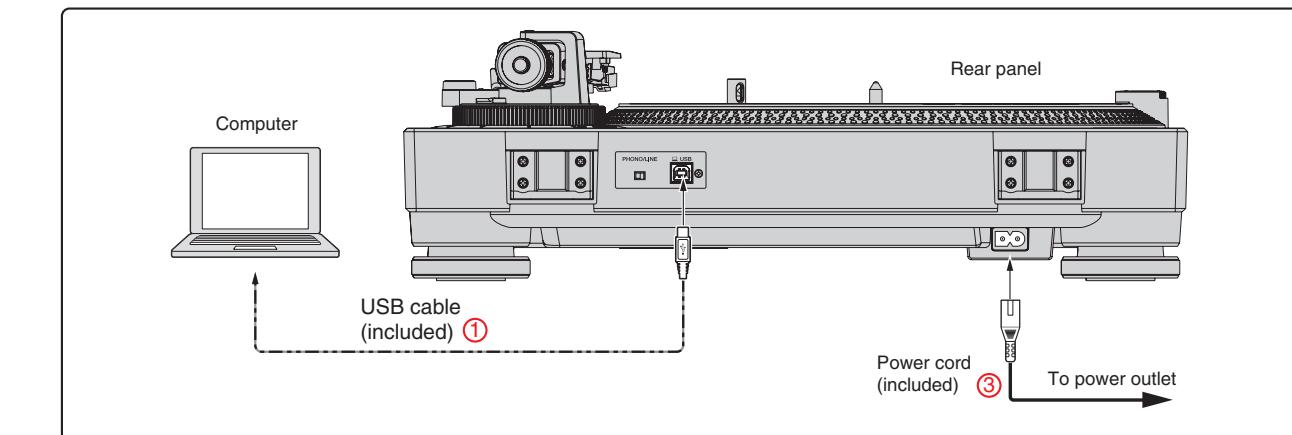

C For downloading, registration of a user account at rekordbox is required.

Unzip the downloaded file, then double-click the unzipped file to launch the installer.

Read the terms of the license agreement carefully, and if you agree, select [Agree], then click [Next](Mac OS X: Continue). After installation is completed, the Installation Completed screen will be displayed. Click on [Finish](Mac OS X: Close) to quit the rekordbox installer.

- Be sure to use rekordbox Version 4.2.1 or later, because the prior versions of rekordbox do not support the PLX-500.

[Connections]

E

[Operating procedures]

F

- ① Connect this unit to your computer via a **USB cable**.
- ② Turn on the computer's power.
- ③ Connect the **power cord**.
- ④ Switch the [POWER] switch on this unit's top panel to the [ON] side to turn this unit's power on.

Run the operation check with rekordbox.

Starting the rekordbox.

① Set REC of the upper panel to active, and display the recording panel window.
 ② Confirm that the recording source display is "USB REC".

When the recording source display is not "USB REC",

- Display the AUDIO tab of the configuration screen.
- Select "REC INPUT" from the pull-down of AUDIO.
- Close the configuration.

③ Comfirm that the recording adjust knob is set to center.
 ④ Place a record on the turntable of this unit. After laying down the stylus, press [START/STOP] button and play back the music.
 ⑤ Confirm that the recording level indicator flashes near the center position.

End the system.

- 1 End the rekordbox.
- 2 Change the POWER switch on the top panel of this unit to [OFF] side, and turn off the power of this unit.
- 3 Unplug the USB cable from the computer.

6. SERVICE MODE

There is no information to be shown in this chapter.

7. DISASSEMBLY

A

Note:

Even if the unit shown in the photos and illustrations in this manual may differ from your product, the procedures described here are common.

Notes on performing diagnosis with the unit turned upside down (on how to secure the tone arm, etc.):

Be sure to secure the tone arm with the hook for the tone arm before turning the unit upside down.
 Remove the items that can fall, such as the turntable and turntable sheet, from the unit beforehand.
 Be sure to use the spacers or a dust cover (GGP1257) dedicated for repair use (NOT the customer's own dust cover) before turning the unit upside down.

B Disassembly for each Assemblies

[1] Exterior Section

- (1) Remove the SPEED PUSH button.
- (2) Remove the 4 screws (602-RP5000-412).

*Except when removing the D.D. Motor Assy, do not remove the 4 screws.

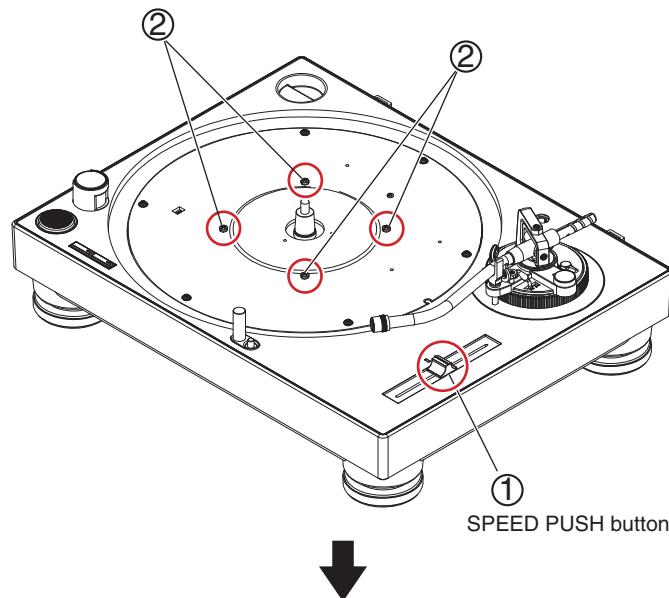

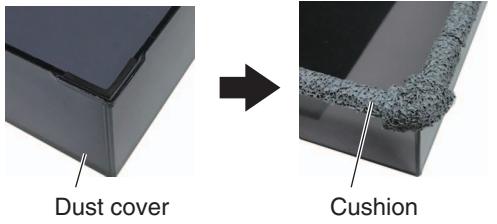

- (3) Turn the unit upside down.

Note:

Before turning the unit upside down, be sure to place the spacers or dust cover so that no load is applied to the tone arm, etc.

As the dust cover is not so strong, be careful not to apply a heavy load.

Put a 4 cushion on the contact part of 4 corners of the Dust cover to prevent you from injuring Top panel.

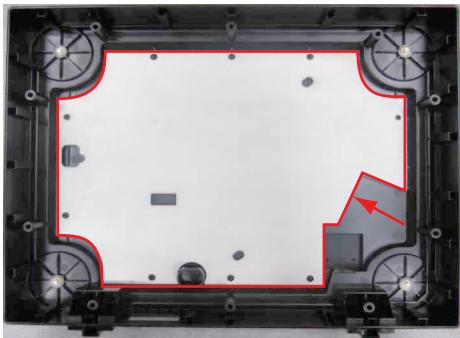

E

F

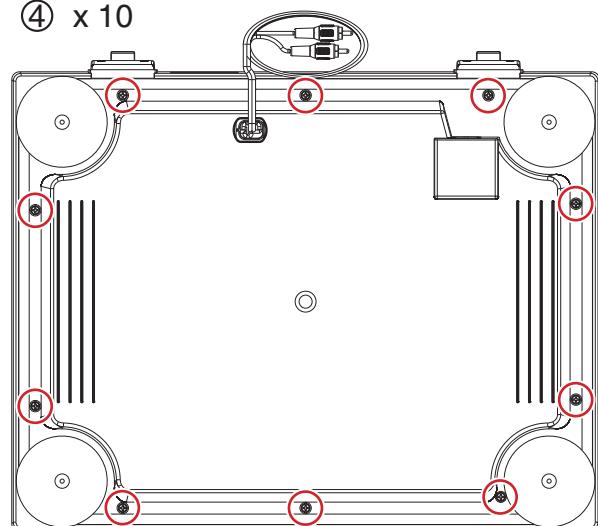

(4) Remove the 10 screws (602-HPTB310-797).

Note:

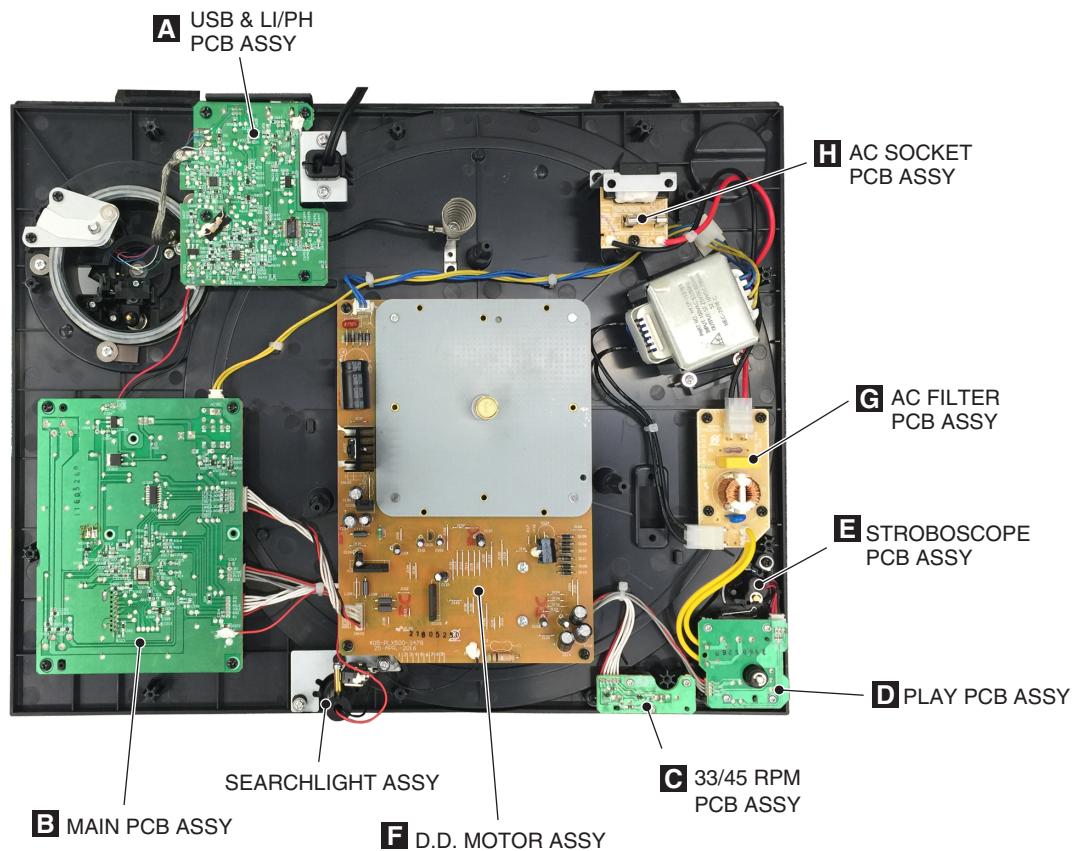

Be careful not to touch sheet metal
(The burr of the outer periphery) that attached to
the bottom case.

④ x 10

• Bottom view

A [1-1] D.D. MOTOR Assy

- (1) Disconnect the connector (CN101).
- (2) Disconnect the connector (CN303) on the MAIN Assy.
- (3) Disconnect the cable (black) of the SEARCHLIGHT Assy.
- (4) Remove the 3 screws (602-DJ5500-452), and then remove the D.D. MOTOR Assy.

Note:

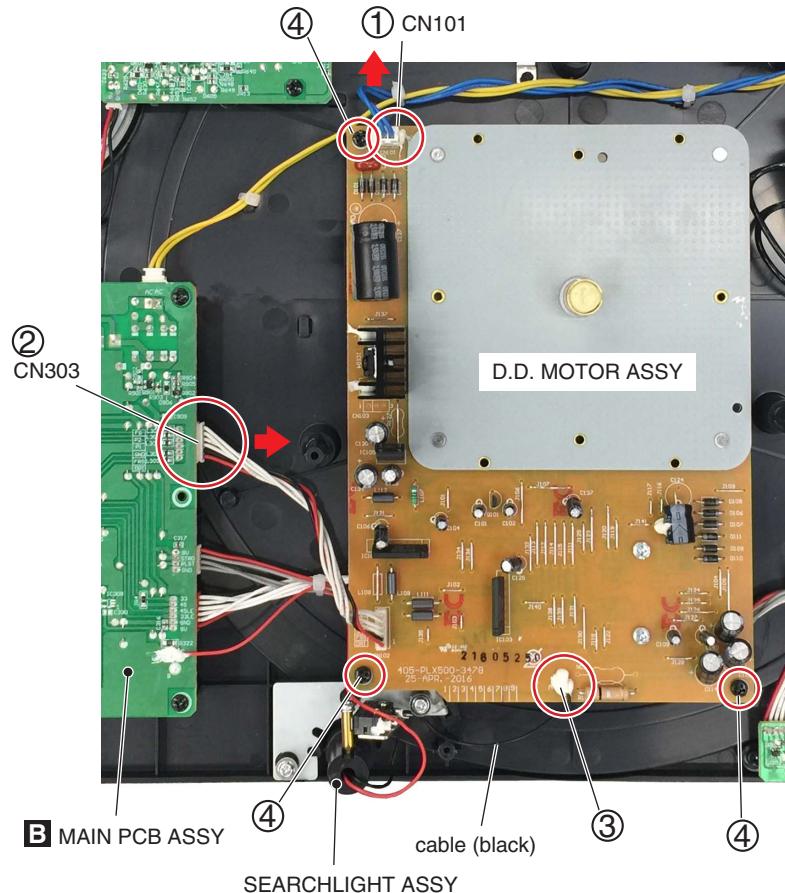

When the removal of the adhesive, apply the adhesive at the time of assembly. (GYL1007)

D.D. MOTOR Assy

Note:

Do not remove the two screws.

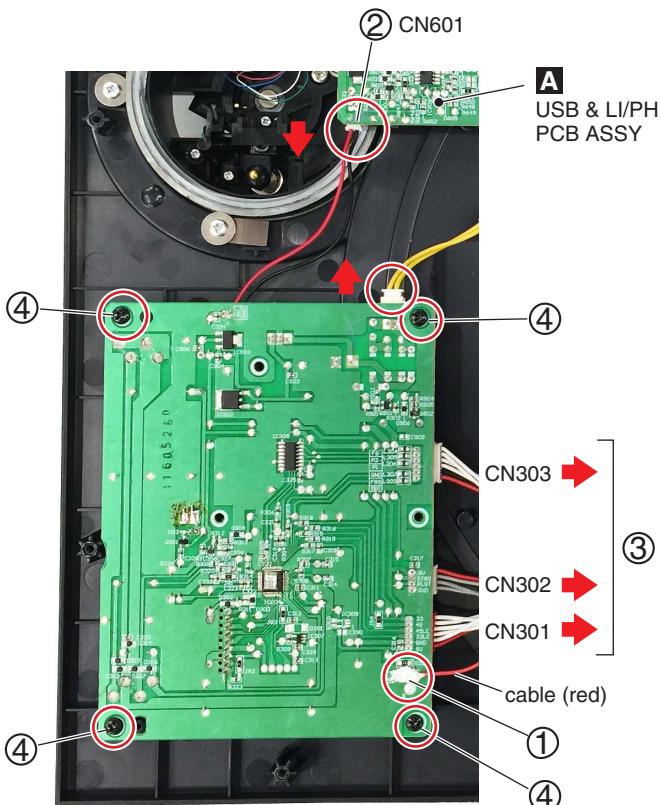

[1-2] MAIN Assy

- (1) Disconnect the cable (red) of the SEARCHLIGHT Assy.
- (2) Disconnect the connector (CN601) on the USB & LI/PH PCB ASSY.
- (3) Disconnect the connectors (CN301, CN302, CN303 and CN901).
- (4) Remove the 4 screws (602-DJ5500-452), and then remove the MAIN Assy.

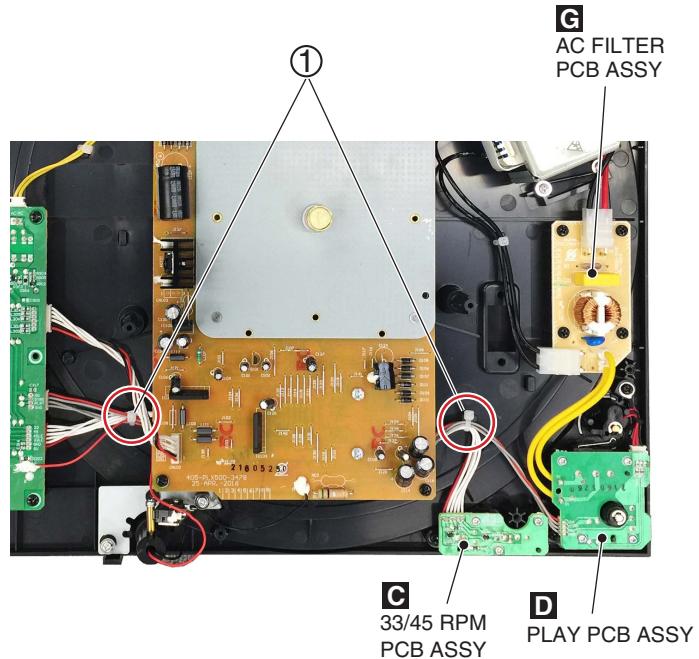

Note:

When the removal of the adhesive, apply the adhesive at the time of assembly. (GYL1007)

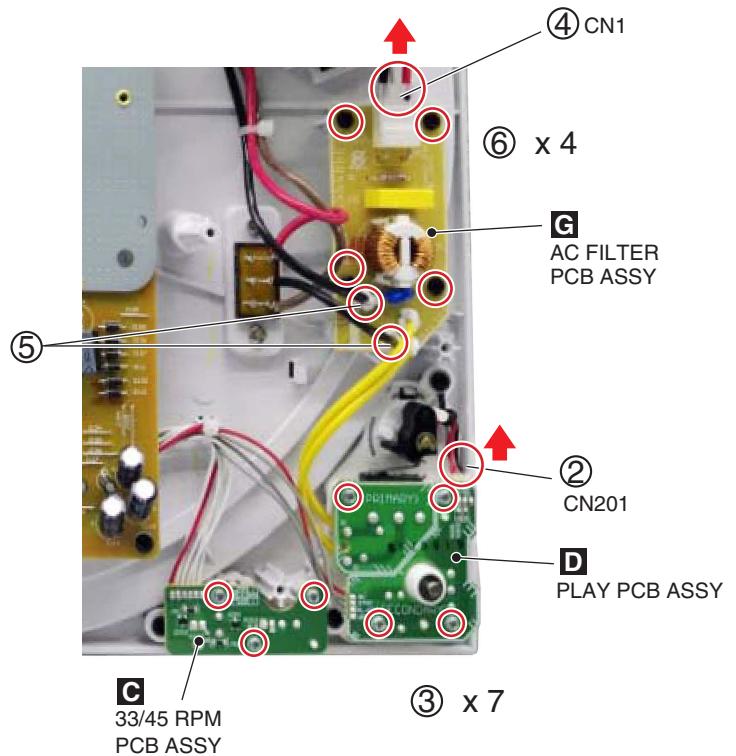

[1-3] AC FILTER, PLAY, 33/45 RPM PCB Assy

(1) Cut the 2 cable ties.

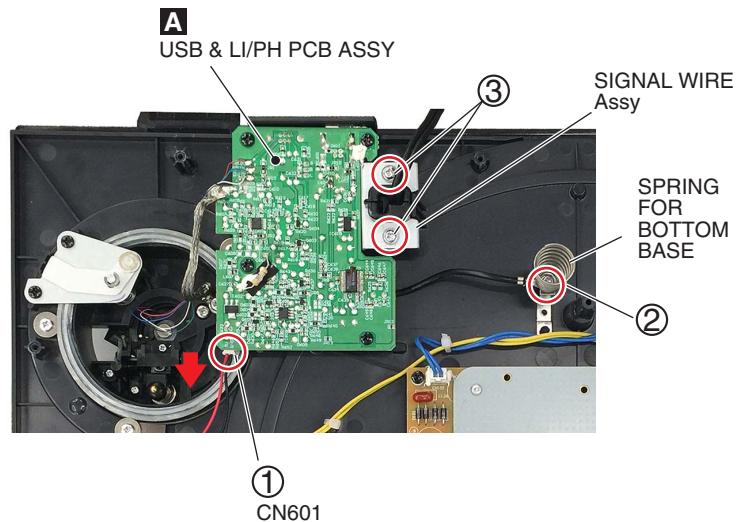

- (2) Disconnect the connector (CN201) on the PLAY PCB Assy.
- (3) Remove the 7 screws (602-SL24F-099), and then remove the PLAY PCB Assy and 33/45 RPM PCB Assy.
- (4) Disconnect the connector (CN1) on the AC FILTER PCB Assy.
- (5) Disconnect the 2 cables (black) of the AC FILTER PCB Assy.
- (6) Remove the 4 screws (602-DJ5500-452), and then remove the AC FILTER PCB Assy.

A [1-4] USB & LI/PH Assy

- (1) Disconnect the connector (CN601) on the PLAY PCB Assy.
- (2) Remove the screw (602-B600-057), and then remove SPRING FOR BOTTOM BASE and wire.
- (3) Remove the 2 screws (602-B600-058), and then remove the SIGNAL WIRE Assy.

B

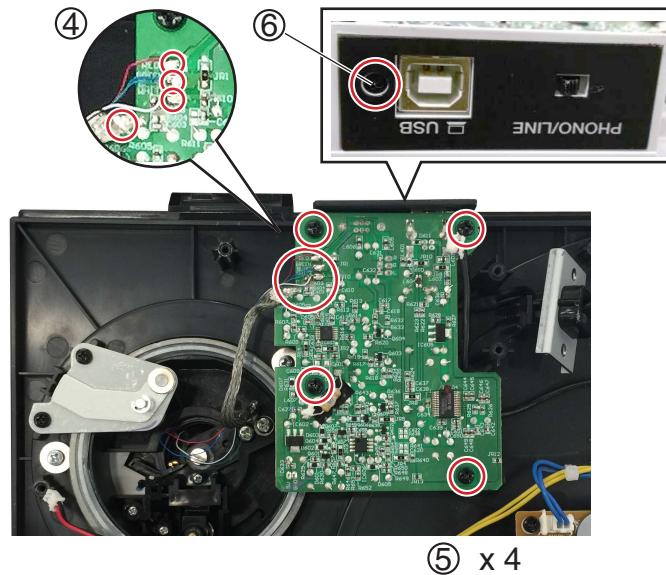

- (4) Remove 4 places of solders.

C **Note:**
Be sure to swiftly remove solder, paying attention not to let the removed solder fall onto the wires for the tone arm.

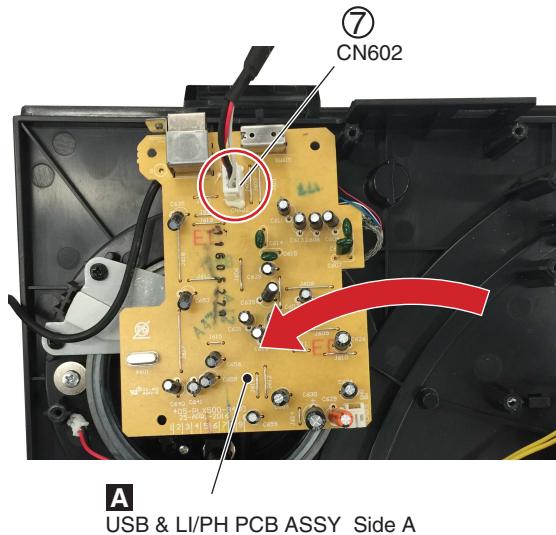

- (5) Remove the 4 screws (602-DJ5500-452).
- (6) Remove the screw (602-ISOF2005-686B).

D

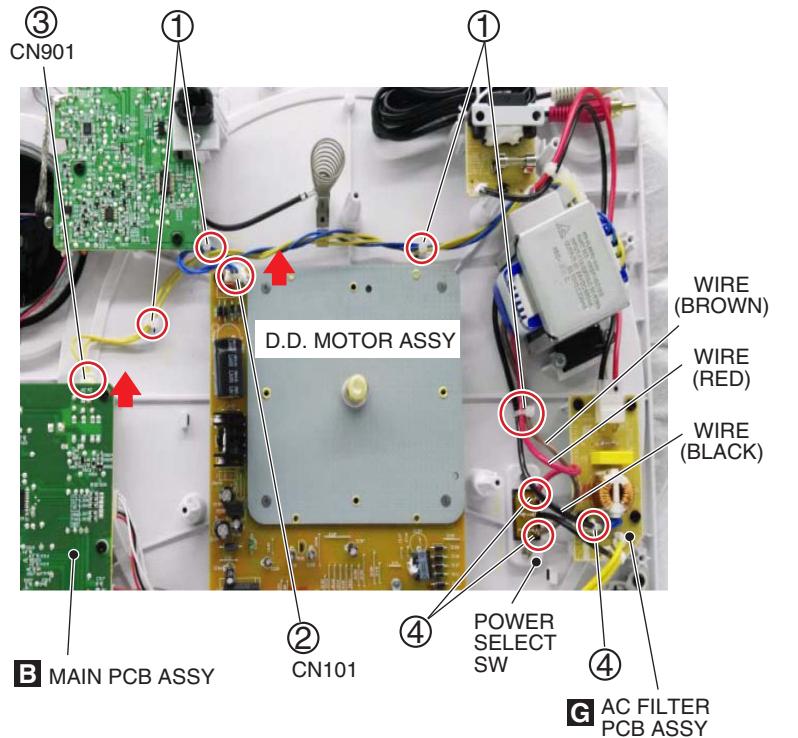

- (7) Disconnect the connector (CN602), and then remove the USB & LI/PH PCB Assy.

E

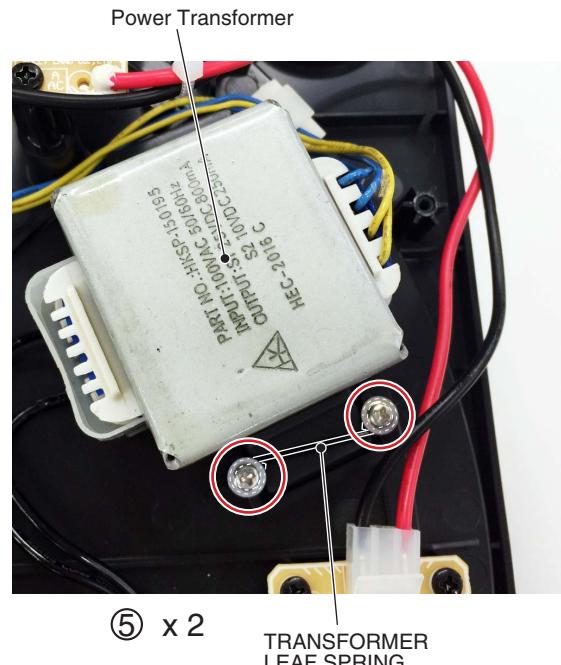

[1-5] Power Transformer

- (1) Cut the 4 cable ties.
- (2) Disconnect the connector (CN101) on the D.D. MOTOR Assy.
- (3) Disconnect the connector (CN901) on the MAIN PCB Assy.
- (4) Disconnect the 2 wires (red, brown) of the POWER SELECT SW.
- Disconnect the wire (black) of the AC FILTER PCB Assy.

- (5) Remove the 2 screws (602-M400-055), and then remove the TRANSFORMER LEAF SPRING.
- Remove the POWER TRANSFORMER.

8. EACH SETTING AND ADJUSTMENT

There is no information to be shown in this chapter.

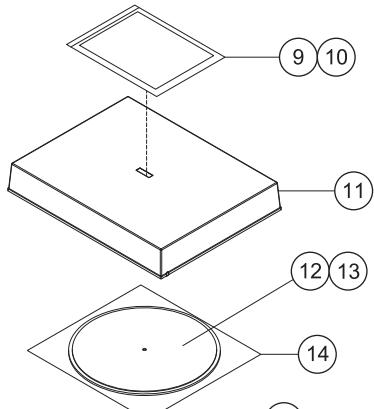

9. EXPLODED VIEWS AND PARTS LIST

NOTES:

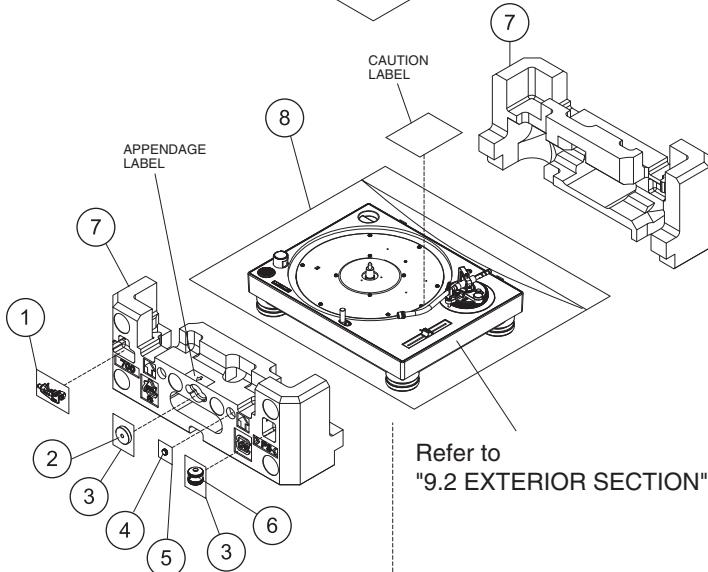

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Screws adjacent to  mark on product are used for disassembly.
- For the applying amount of lubricants or glue, follow the instructions in this manual. (In the case of no amount instructions, apply as you think it appropriate.)
