

Genesis® Series AMP-150

The Ultimate Support AMP-150 is the perfect addition to the gigging guitar player's rig. Not only does it comfortably hold a small to mid-sized combo amp up to 75 lbs, but it's tilted (putting the sound where you need it instead of at your feet), AND it features a mic boom attachment making an additional mic stand obsolete!

Adjustable AMP Stand

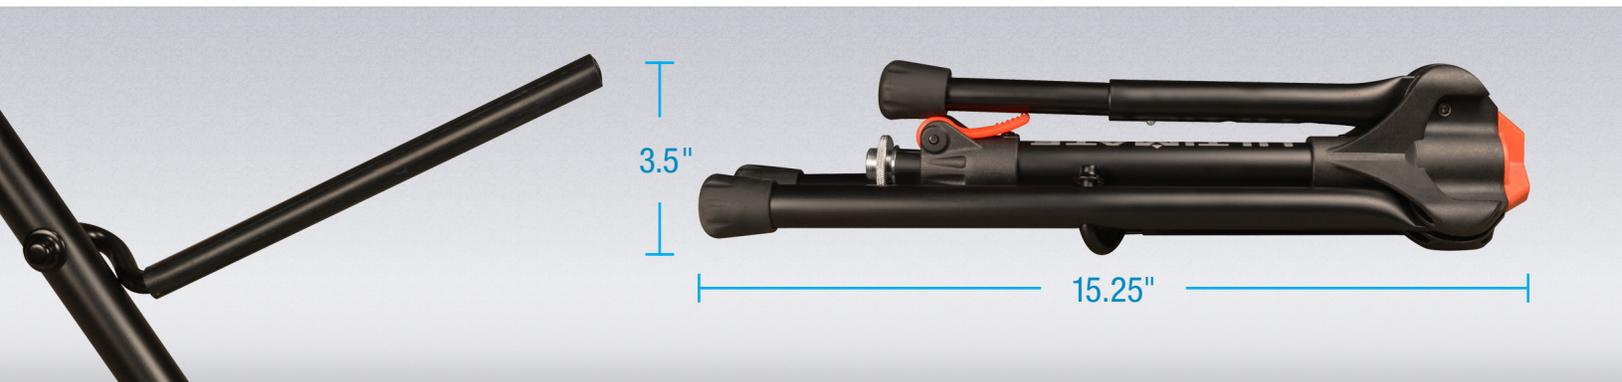

The AMP-150 back leg has three-positions to adjust the angle of the amp. The center pole height adjust for the mic boom and amp.

Mic Boom Attachment

On the top of the AMP-150 is included a 5/8" mic boom attachment (Boom not included).

Leg Locking System

Ultimate's patented leg locking system allows for easy fold up and storability. Locks in both folded and unfolded positions.

Support Arms

Support arms secure amp and include padding, to avoid damage to amp surface.

Portable

One of the most noticed features of the Genesis Series stands is their compact design, which allows for efficient storage and transport. This is possible because the legs fold up, not down, and lock in place.

AMP-150 Specs

- Part Name: AMP-150
- Part Number: 13464
- Height: 18" - 24"
- Support Arms Width: 11"
- Folded Dimensions: 3.5" x 15.25"
- Load Capacity: 75 lbs.
- Mic Adapter Thread: 5/8"
- Weight: 3.1 lbs.
