Truma AquaGo® – instant hot water available in recreational vehicles

Truma has developed a revolutionary generation of instant water heaters that are perfectly balanced to enhance the comfort of RVers on the road. Customers whose vehicles are equipped with the Truma AquaGo® will have a comfortable water temperature, while enjoying an unlimited supply of hot water without the risk of scalding.

Available models

Truma AquaGo® basic *

Truma AquaGo® comfort *

Truma AquaGo® comfort plus *

Unique features

- The only instant water heater utilizing hybrid technology with a temperature stabilizer (mixing vessel)
 - The industry's only true instant water heater ensuring hot water at every tap, any time**
 - Adjust water temperatures like at home for greater comfort
 - When showering, a constant hot water temperature is maintained even after the water is turned off and then back on again – No scalding
 - Can be used even during freezing temperatures**
- At 60K BTU, the most powerful water heater on the market
 - Constant water temperature, with high and low flow rates
 - Microprocessor controlled stepless burner management between 20,000 and 60,000 BTU
- Simple maintenance with "Easy Drain Lever"
 - The industry's only instant water heater that can be decalcified with Truma decalcification tablets
 - Semi-automatic cleaning: Simply slide the tablets into the Easy Drain Lever filter and the interior Truma AquaGo® control panel guides the user through the decalcification process
 - Open lever for quick winterization as water is diverted away from the vehicle eliminating water staining and the need for any special tools
 - Reusable filter cartridge protects the internal components
- Operates at flows below 0.4 gallons per minute

* Patent pending

Fuel	LP Gas (Propane only)		
Fuel inlet pressure	10.5"–14" wc (26.2–34.9 mbar)		
Fuel manifold pressure	1.3"–10" wc (3.2–24.9 mbar)		
Nominal voltage	12VDC		
Power input	< 1.5 A	< 2.5 A	< 2.5 A
Power input incl. Antifreeze	–	< 5 A	< 5 A
Water operating data			
Water operating pressure	65 psi (4.5 bar) maximum		
Standard water outlet temperature	120°F (49°C)		
Water volume	0.35 gallons (1.3 liter)		
Shipping weight (approximate)	41.0 lbs. (18.6 kg)		
Weight (approximate)	34.2 lbs. (15.5 kg)		

Truma AquaGo® decalcification tablets

The Truma AquaGo® is the only instant water heater on the market which can be conveniently decalcified. The Truma AquaGo® control panel indicates when decalcification is recommended, which will vary depending on the water hardness and intensity of use.

Find out more:
www.truma.net/aquago-clean

Unique features

- Semi-automated decalcification: The tablets are inserted into the “Easy Drain Lever’s” filter cartridge and the control panel guides the user through the decalcification process
- The tablets have been extensively tried and tested for material compatibility and effectiveness
- Keeps your AquaGo as good as new: Maintains efficiency and water flow like on the first day, even when used intensively

Truma AquaGo® control panel

The interior control panel comes standard on all Truma AquaGo® comfort and Truma AquaGo® comfort plus models. Older models and basic versions can be easily retrofitted.

Unique features

- Convenient operation of the Truma AquaGo® from inside the vehicle
- Selection of operating modes “eco on”, “comfort on”, “off” (standby)
- Semi-automated decalcification mode “clean”:
The LED indicates when the device needs to be decalcified and guides the user through the process with LED signals
- Optional operating mode “antifreeze protection” available with electric antifreeze kit

Truma AquaGo® electric antifreeze kit

The electric antifreeze kit allows you to protect your Truma AquaGo® comfort or Truma AquaGo® comfort plus from freezing without the use of LPG.

Unique features

- Keeps the AquaGo comfort or comfort plus frost-free down to -4°F (-20°C)
- Runs on electricity only (12VDC): May be operated without LPG even in stand-by mode when the burner is off or while driving when LPG cylinders are closed
- Draining the water is not necessary
- Plug and play: Easily retrofitted in just a few minutes. The electric antifreeze kit is inserted into the “Easy Drain Lever” and plugged to the cable harness

Truma AquaGo® upgrade kit

The upgrade kit enables AquaGo basic users to benefit from all features of the comfort models.

- Upgrade the Truma AquaGo® basic to Truma AquaGo® comfort
- Easy installation at your local Truma authorized dealer or Truma Sales and Service Center
- Upgrade kit consists of the AquaGo circulation pump, installation material and control panel

Find a local dealer at www.truma.net or call **1-855-558-7862** to upgrade your RV water heater to the Truma AquaGo®, the industry's leading luxury on-demand water heater.

Truma Combi® – Hot air. Hot water. One amazing appliance.

With more than 20 years of reliable service in Europe and Australia, Truma Combi® furnaces are the most energy-efficient and lightest heating systems on the market. They effectively combine warm air and hot water in one appliance. Truma Combi® furnaces offer much more operating convenience with the digital control panel Truma CP plus.

Variations

The following Truma Combi® variations are certified and available for the North American market:

Truma Combi® eco and eco plus
Truma Combi® comfort and comfort plus

Unique features

- Near-silent operation
- Lightweight, space-saving solution
- Maintains constant temperature throughout the RV
- Optional electric heating for air and water
- Highest available energy-efficiency up to 90%

The Truma Service Difference

A commitment to our customers is part of Truma's history and core to values. Since 1972, Truma has built a best-in-class service network throughout Europe and we are continuing that tradition in North America. Following the pattern of its headquarters in Germany, Truma North America has over 100 Truma Certified Dealer Partners trained to service and install the Truma AquaGo®.

Truma Sales & Service Centers are now available and also offer mobile service. Truma service technicians support customers with Truma products in addition to our quality dealer network.

Truma technicians install, upgrade and service the Truma AquaGo® hybrid instant water heater along with other products like the Truma Combi®, combination forced-air furnace and hot water heater. Technicians are also available to service Truma products on RVs at customer's homes and at nearby campgrounds.

Find a Truma Dealer Partner or Truma Sales and Service Center today for :

- Service
- Sales
- Warranty
- New installations
- Upgrades to existing products

Make an appointment to upgrade your RV water heater to the Truma AquaGo® instant water heater

The Truma AquaGo® can replace any 6-16 gallon or tankless RV hot water heater. Visit us at www.truma.net or find Truma North America on Facebook.

Our success has a history

It all started in the post-war years when Philipp Kreis developed a gas light so that he could teach in the evenings at his language school in Munich despite the power cuts. Back then he named his company after the US President Truman, who enabled Germany to be reconstructed with the Marshall Plan.

Over 65 years later Truma has become a renowned innovative systems supplier for motorhomes, travel trailers, and mobile applications. Our comprehensive product portfolio includes heating systems, air conditioning systems, water and maneuvering systems, and gas and power supplies.
