Note: Choosing one of the options listed in each zone is the minimum zone requirement that is needed to meet the NFPA 1901 Standard for Automotive Fire Apparatus 1999 Edition, Table 11-8 12.4 (Minimum Optical Power Requirements for Apparatus). If additional lighting is needed to meet lower zone distance requirements only, you can use any of our warning lightheads shown on pages 33, 34, or 35 of this brochure.

*Requires optional flange purchased separately
Note: Underscored model numbers indicate need for remote LED ballast.

See inside cover of this booklet to CHOOSE an NFPA approved Strobe Power Supply or a Halogen Flasher.
See Amp Draw Charts on pages 36 and 37 for overall amperage consumption.
Some LED lightheads have internal flasher module and do not need a flasher unless a specific flash sequence is needed.
Underscored LED lightheads need a remote ballast to operate.
